NEW THIS FALL!

BE HEARD FOR WHO YOU ARE!
A New 8-session Voice and Communication Group for Trans* Youth and Young Adults

A partnership between
The Gender & Sex Development Program at Ann & Robert H. Lurie Children’s Hospital of Chicago &
The Center for Audiology, Speech, Language, and Learning at Northwestern University

The “Be Heard for Who You Are” group helps trans* people (up to age 24) find a comfortable voice and communication style that reflects their affirmed gender.

The 8 weekly sessions are led by trans*-affirming speech-language pathologists from the Northwestern University Center for Audiology, Speech, Language, and Learning.

Each group participant will:
- Have their speech, voice and language assessed through a one-on-one meeting with a speech therapist,
- Develop personal therapy goals that address their needs,
- Learn new skills related to parts of communication like pitch, intonation and stress patterns, breath support, resonance, volume and intensity, articulation, speaking rate, language and pragmatics,
- Benefit from opportunities to practice new skills with other trans* group members,
- Find an optimal and healthy voice through discussion of the physical aspects of voice and communication, and
- Connect with other trans* group members who are also meeting their communication goals!

Groups will take place at the Lurie Children’s Center for Gender, Sexuality and HIV Prevention
Division of Adolescent Medicine, 467 W. Deming Place, Ste 4003, Chicago, IL 60614
Mondays 6:00 p.m. - 7:00 p.m.
October 5 – November 23
